

Multidimensional Poverty Index -Applications Colombia

Bruce Mac Master Director Department for Social Prosperity

Oxford, June 2013

Our starting point: Improving the instruments and methodologies of poverty measurement

Motivation: Designing a strategy for the reduction of poverty and inequality based on a complete approach using income and multidimensional measures

Institutional agreement on the measurement of poverty

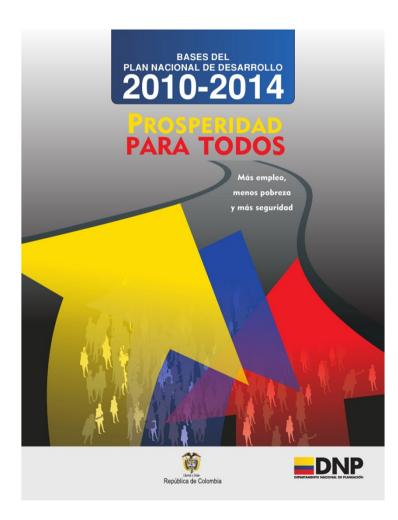

<section-header><section-header><section-header><section-header><text><text><text><text><text>

The National Department of Statistics acquired the responsibility of producing the official poverty measurements on a year basis

Technical and methodological decisions are defined at the experts-committee (NPD, DSP, external experts)

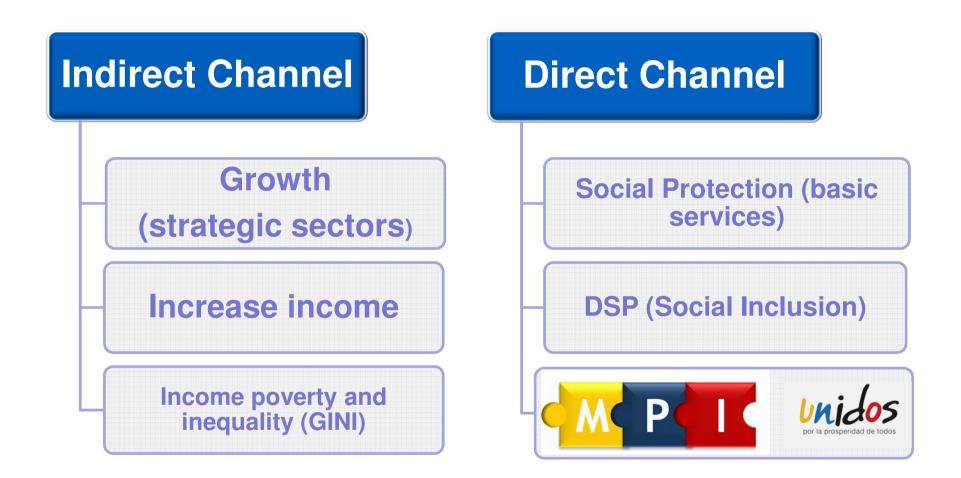

A complete strategy for the reduction of poverty

National Development Plan 2010-2014 "Prosperity for all"

Two channels for the reduction of poverty

Fuente: Bhagwati

SECTOR OF SOCIAL INCLUSION

Sector of Social Inclusion Department for Social Prosperity (Ministry)

Objective: guarantee equality in opportunities, eradicate extreme poverty and ameliorate the living conditions of the victims and most vulnerable households

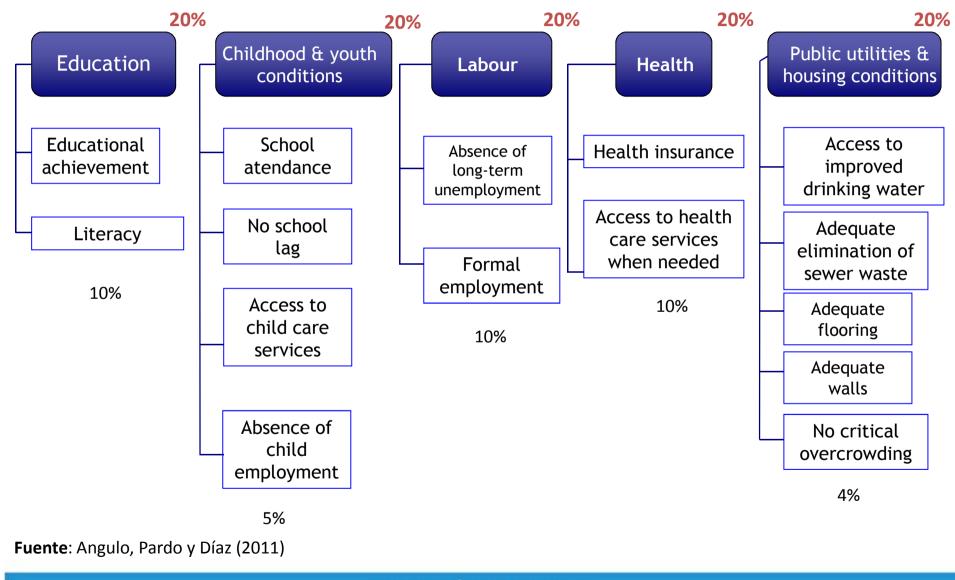

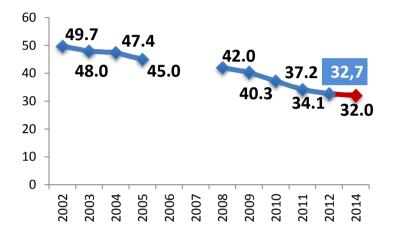

5 dimensions & 15 variables

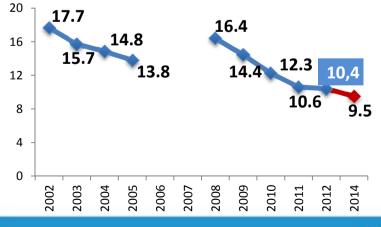

Pobreza monetaria

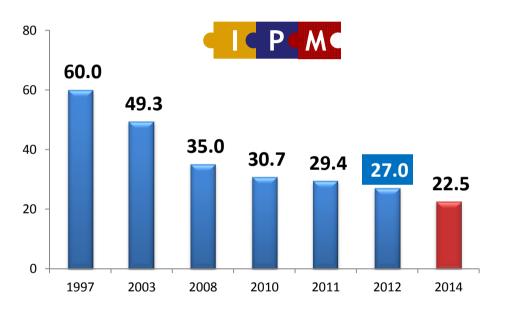

Pobreza extrema monetaria

We are on are the right track Sustained poverty reduction

Pobreza Multidimensioal

Fuente: DNP'SPSCV

From 2010 to 2012, 1,7 million persons overcame income poverty and 700 thousand extreme poverty

On the other hand, 1.3 million persons were no longer multidimensionally poor

To what do we owe these good results?

2010 Alerts: -Habitability -School achievement -Early childhood care -Income generation

2010- 2011 Policies:

- Free tuition fees in primary and secondary education
- •National strategy for childhood care "De cero a Siempre"

MPI - Colombia

• A key aspects:

- 1. Reflects the objectives of social policy
- 2. Strategically designed for it to include all public policy sectors
- 3. Practical instrument for monitoring public policy
- 4. Useful alerts for decision -making at a short notice

MPI implied an important achievement on public policy coordination

Shared responsibilities on the strategy for poverty reduction

High Official Commission

Monitoring the national strategy for the reduction of poverty using official poverty measures

- Leaders
 - Presidency (Mandatory presence of the President of Colombia)
 - Department for Social Prosperity
 - National Planning Department

Permanent members

- Ministry of Health
- Ministry of Labour
- Ministry of Housing
- Ministry of Agriculture
- Ministry of Education
- Ministry of Finance

Goals in the reduction of poverty using a complete profile (MPI & income)

		e 0%-10% a	e 0%-10% avance e 10%		🔵 >25% avanc
Poverty and Inequality	Base Line 2009	2011	Alert	2012	Goal
 Income poverty (% LP) 	40.2%	34,1%	•	32.7%	32%
 Extreme income poverty(%LI) 	14.4%	10.6%	•	10.4%	9.5%
 IPM (Multidimensional poverty) Base line 2008 	34.6%	29.4%	•	27.0%	22.5%
 Graduated families from extreme poverty (Unidos) 	0	581	•	46,000	150.000

*** Change 2011-2012 est. signitifcant

If every ministry target beneficiaries accordingly and spends the committed resources, the official goal will be achieved

The MPI will decrease (12 p.p) from 34.6% in 2008 to 22% 2014 (more than 3 million people out of poverty)

A useful tool for public policy implementation

Applications

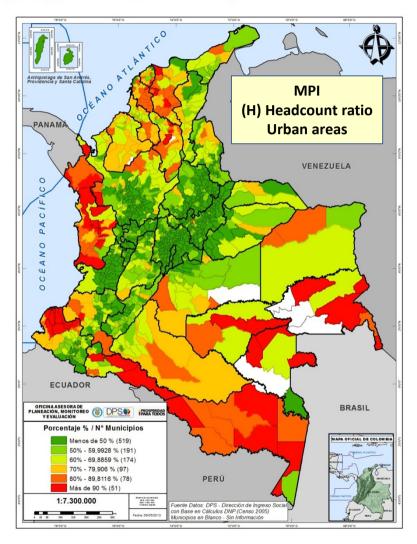

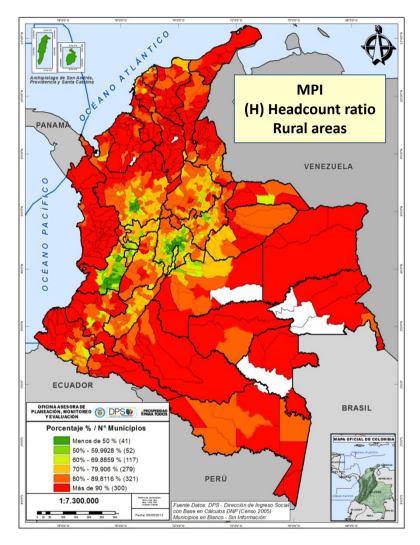

Geographical Targeting (Municipal Poverty Maps)

Municipal MPI Colombia Headcount ratio, urban-rural areas, 2005

MPI proxy based on Census Data 2005

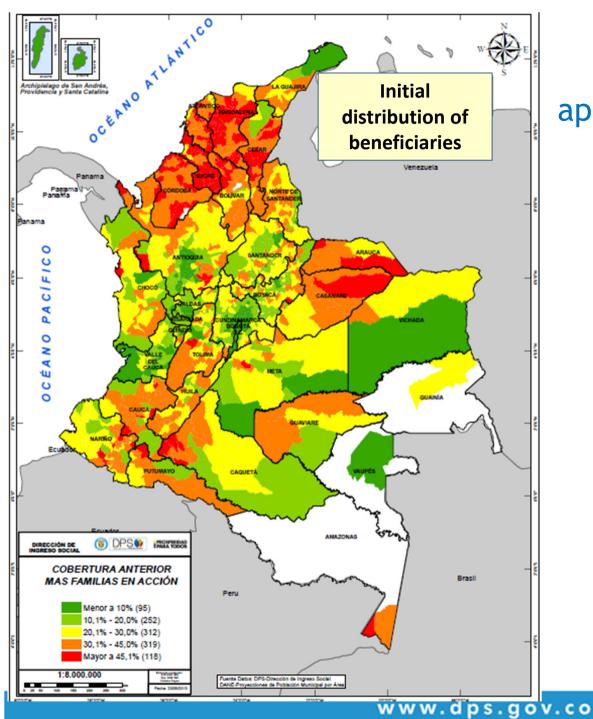

DEPARTAMENTO PARA LA PROSPERIDAD

An example of geographical targeting using MPI

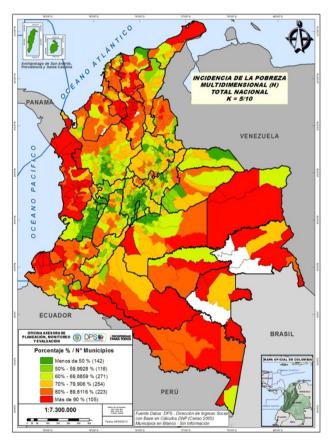

Conditional Cash Transfer Program "Más Familias en Acción"

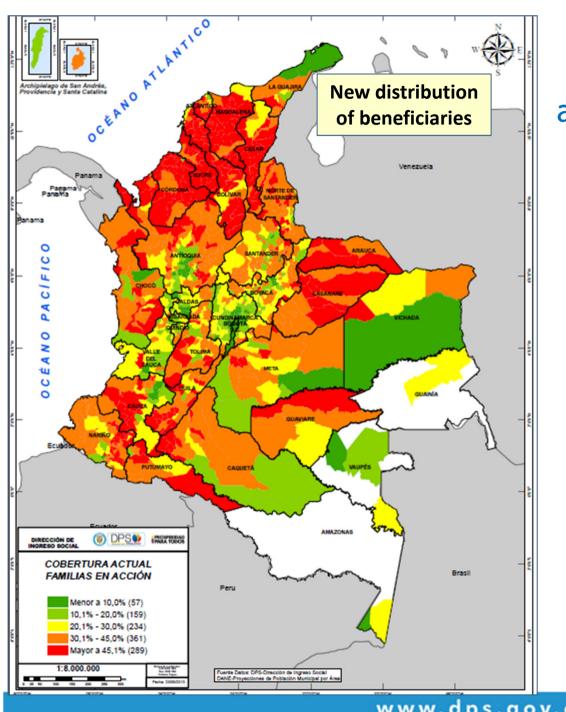

2.7 million families

Re targeting program's beneficiaries: approximating to municipal MPI

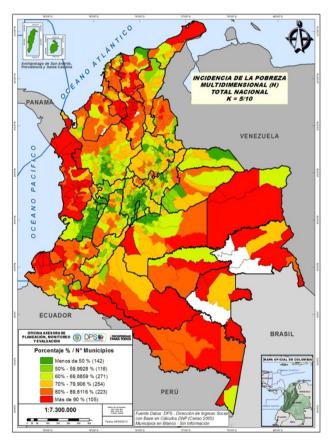

National - MPI

Re targeting program's beneficiaries: approximating to municipal **MPI**

National - MPI

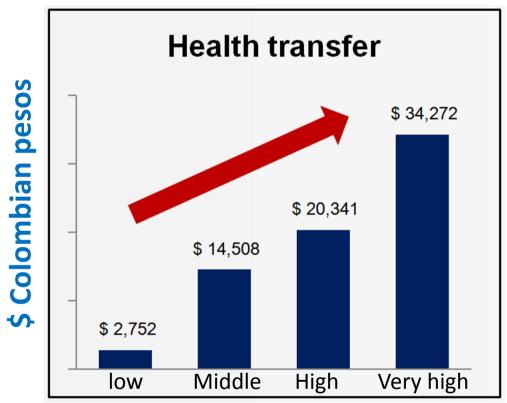

www.dps.gov.co

One example

MPI Municipal Head Count Ratio

Differentiating transfer amounts according to municipal MPI

Higher amounts on the poorer and rural areas

Targeting beneficiaries according to specific dimension deprivations

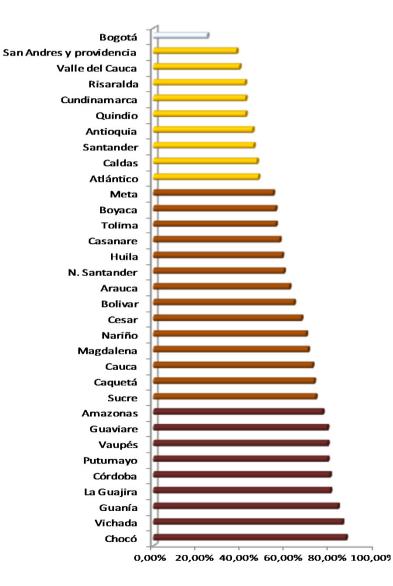

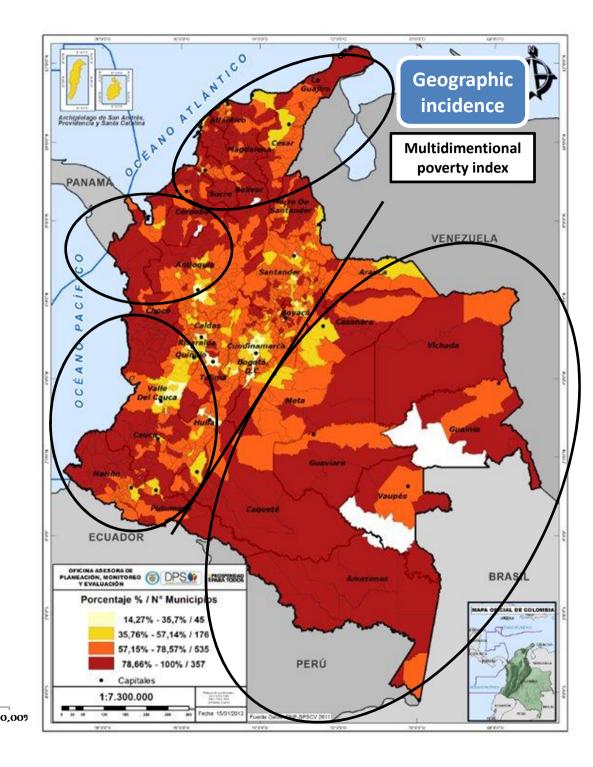

Targeting beneficiaries identifying:

Where? What? To whom?

Using MPI

Different types of social programs depending on multidimensional poverty incidence

2

Safety Net Program

como uno por la prosperidad de todos

Sufficient condition:

£

Not in extreme income poverty

Not multidimensionally poor

Adjusted - MPI for indigenous groups

 Revising the MPI (missing dimensions, cutoffs or weights) in order to adapt the index to the conditions of indigenous population of Colombia

• The objective is to have a pertinent MPI useful for the design of public policy targeting this population

Public policy effects micro-simulations

The method of micro data imputation may be used in the construction of counterfactual scenarios to evaluate the effect of public policy on the MPI behavior

PROSPERIDAD PARA TODOS
