Poverty Measurement in the Philippines¹

Lisa Grace S. Bersales
National Statistician
Philippine Statistics Authority

¹ presented at the Side Event on Multidimensional Poverty Measurement, 46th Session of the UN Statistical Commission

Official Poverty Statistics in the Philippines

- Highly anticipated by many stakeholders
- Income-based
- Compared with self-rated poverty statistics by a private group
- Need to capture other dimensions
- Technical Committee on Poverty Statistics provides guidance

Poverty Incidence for Families Philippines

Study by Planning Minister

- Multidimensionality of poverty: No longer debatable
 - "Multiple deprivations of different kinds... experienced simultaneously by the poor"
 - "beyond growth much needs to be done to make development more inclusive "
- No one-for-one correspondence between income poverty & other deprivations
- Increasing demand from policy makers
- New methodologies exist
- Alkire-Foster methodology>> dashboard of dimensions of poverty

Nationally representative surveys

DATASET	YEARS AVAILABLE
National Demographic and Health Survey (NDHS)	1993, 1998, 2003, 2008
Family Income and Expenditure Survey (FIES)	1988, 1991, 1994, 1997, 2000, 2003, 2006, 2009, 2012
Annual Poverty Indicator Survey (APIS)	1998, 2002, 2004, 2007, 2008, 2010, 2011, 2013*

^{*}Unit record data not yet available at the time of study

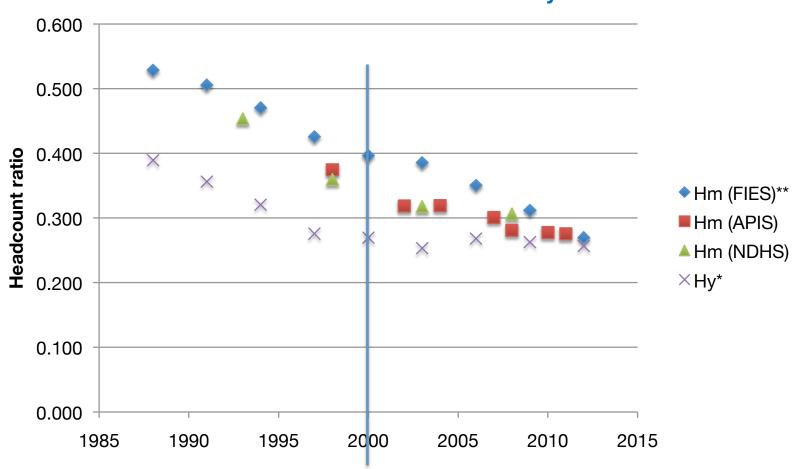

Weights

	Health	Education	Standard of Living				
Weight	1/3	1/3	1/3				
Components (equal weights, nested)							
NDHS	2 (2)	2	4				
FIES	2 (3)	2	5 (7)				
APIS	2 (3)	2	4 (7)				

Achievement (Deprivation) Dimensions

	NDHS	FIES	APIS
HEALTH

Multidimensional Headcount (H_m) vs. Income Headcount (H_v)

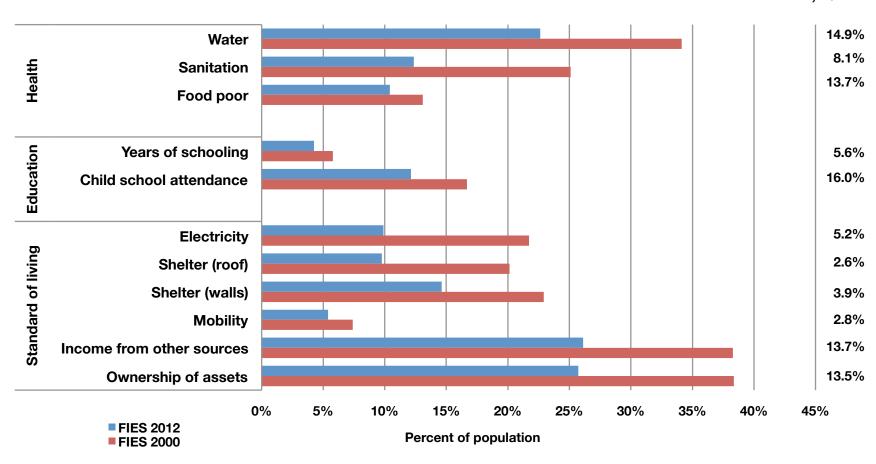

^{*}Uses official per capita food poverty threshold for 2009 (among families).

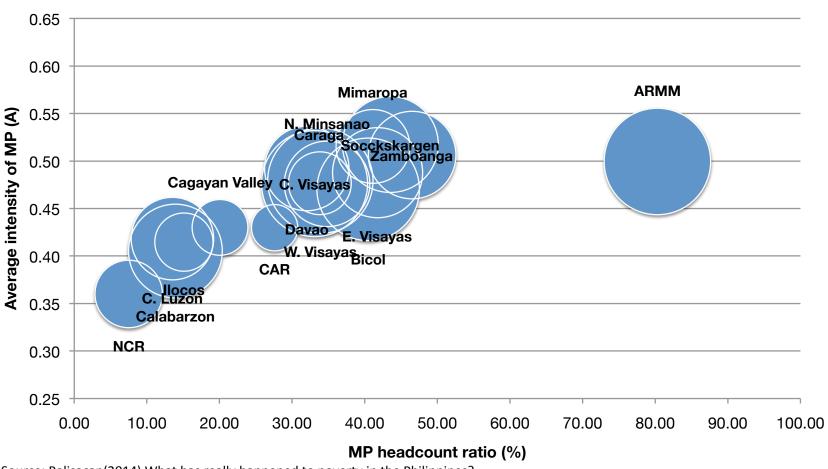

^{**}Note: Line indicates that before 2000 the FIES-generated MPI uses a different definition of assets.

Percentage of population who are MPI poor and deprived in each indicator

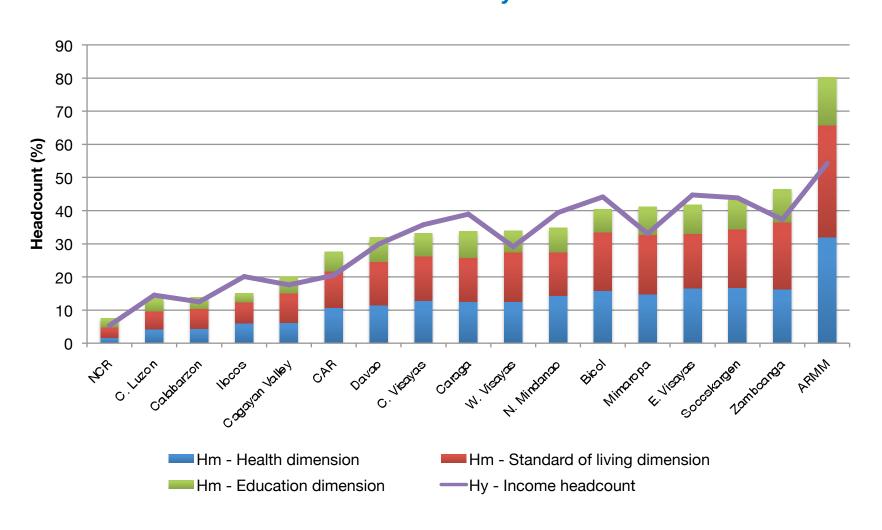

Percent contribution to MPI, 2012

Intensity & headcount of multidimensional poverty, by region, FIES 2012

Multidimensional headcount (H_m) vs. Income headcount (H_v) , FIES 2012

Moving Forward

- Study to start in March 2015 on enhancing household surveys including development of an integrated household survey for a comprehensive framework for poverty measurement in the Philippines
- Need a communication plan for the comprehensive framework
- For review and endorsement of the technical committee

• Thank you!
