

## **Multidimensional Poverty Index Questionnaire**

### **General Notes:**

- This questionnaire is a prototype for collecting only the information required for the computation of the global Multidimensional Poverty Index (MPI) (Alkire, Kanagaratnam, Nogales and Suppa, 2020; Alkire and Santos 2010; UNDP Human Development Reports 2010-2014).
- The document was produced to meet the demand of those who wish to incorporate only those questions that would be required to construct an MPI into a questionnaire that may also cover other topics.
- The global MPI is mainly computed using the Demographic and Healthy Survey (DHS) and the Multiple Indicator Cluster Survey (MICS) (Alkire, Kanagaratnam and Suppa, 2020).
- There are four different questionnaire aimed at four different categories of respondents within the household:
  - Household Questionnaire
  - Child Questionnaire
  - Women's Questionnaire
  - Men's Questionnaire
- The questionnaires draw on both the DHS and MICS questionnaires. The DHS and MICS were designed to gather comprehensive information on various economic and health factors.
- This questionnaire is designed to collect information on the 10 indicators of the MPI:
  - Education for every individual of the household
  - Living Standard of the Household – electricity, cooking fuel, water, sanitation, flooring and assets
  - Child Mortality
  - Child Anthropometry for all children between 0-5 years of age
  - Women's Anthropometry for all women between 15-49 years of age
  - Male Anthropometry (if possible) for all men between 15-59 years of age
- The questionnaire indicates who within the household should (ideally) respond

## **Cover Sheet – Household Questionnaire**

**Town/City/Village/:** \_\_\_\_\_

**HH ID:** \_\_\_ \_\_\_ \_\_\_

**Survey Date 1:** \_\_\_ \_\_\_ / \_\_\_ \_\_\_ / \_\_\_ \_\_\_ \_\_\_ \_\_\_

**Survey Date 2 (if revisit):** \_\_\_ \_\_\_ / \_\_\_ \_\_\_ / \_\_\_ \_\_\_ \_\_\_ \_\_\_

**Surveyor 1 ID (Male):** \_\_\_ \_\_\_

**Surveyor 2 ID (Female):** \_\_\_ \_\_\_

**Start Time:** \_\_\_\_\_

**End Time:** \_\_\_\_\_

**Consent:** Hello. My name is \_\_\_\_\_. I am working with (NAME OF ORGANIZATION). We are conducting a survey about living standards and health all over (NAME OF COUNTRY). The information we collect will help the government to plan services. Your household was selected for the survey. I would like to ask you some questions about your household. The questions usually take about 20 to 25 minutes. All of the answers you give will be confidential and will not be shared with anyone other than members of our survey team. You don't have to be in the survey, but we hope you will agree to answer the questions since your views are important. If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time.

In case you need more information about the survey, you may contact the person listed on this card.

Do you have any questions?

May I begin interview now?

---

**Date:** \_\_\_\_\_

### **MPI Indicator Code**

The following codes are used alongside questions presented below in order to illustrate their purpose in MPI calculation. Codes are as follows:

**[GQ]:** General Quality Check

**[GIQ]:** Indicator-Specific Quality Check

**[YS]:** Education Indicator - Years of Schooling

**[SCA]:** Education Indicator – School attendance

**[CHH]:** Health Indicator – Child Malnutrition

**[ADH]:** Health Indicator – Adult BMI

**[CM]:** Health Indicator – Child Mortality

**[HSG]:** Standard of Living Indicator – Housing

**[TO]:** Standard of Living Indicator – Improved Sanitation

**[WA]:** Standard of Living Indicator – Improved Water

**[CF]:** Standard of Living Indicator – Cooking Fuel

**[EL]:** Standard of Living Indicator – Electricity

**[AS]:** Standard of Living Indicator – Assets

## I. Household Questionnaire

- **The purpose of the roster** is to document the age, gender of all household members in order to process relevant information on education and health for them. Malnutrition calculations based on anthropometry require the age and gender of the person observed. Information from the roster also allows for quality control during data cleaning and preparation for MPI computation
- **Respondent for the section** – Adult (man or woman) most knowledgeable about the household and available at the time of the survey
- **Who in the household should be included in the roster?** The MPI looks at deprivations of members who ‘usually’ live in the household. Temporary ‘guests’ of household, who happened to have spent the night before the interview, are not included in calculation. Thus, the roster should include all ‘usual members’<sup>1</sup> of the household defined as a person who usually lives in the household and shares food from a common source.

### Roster, Education and Living Standards

	MPI Indicator	Household Roster			
	<b>Interviewer Instruction</b>	<i>Interviewer.</i> Please tell me the name of each person who usually lives here, starting with the head of the household. [List the each member in a separate column. After completing the roster, fill checkpoint 6a]			
1	<b>Line Number</b> [GQ]	<b>Member 01</b>	<b>Member 02</b>	<b>Member 03</b>	<b>Member 04</b>
2	<b>Name</b> [GQ]	Name	Name	Name	Name
3	<b>Age</b> [GQ; GIQ]	Years: <input type="text"/> <input type="text"/>  Months: <input type="text"/> <input type="text"/>	Years: <input type="text"/> <input type="text"/>  Months: <input type="text"/> <input type="text"/>	Years: <input type="text"/> <input type="text"/>  Months: <input type="text"/> <input type="text"/>	Years: <input type="text"/> <input type="text"/>  Months: <input type="text"/> <input type="text"/>

Hello. My name is \_\_\_\_\_. I am working with (NAME OF ORGANIZATION). We are conducting a survey about living standards and health all over (NAME OF COUNTRY). The information we collect will help the government plan services. Your household was selected for the survey. I would like to measure your child's (children's) height and weight. Measurements usually take about 10 to 15 minutes. All of the collected here will be confidential and will not be shared with anyone other than members of our survey team. You don't have to be in the survey, but we hope you will agree to participate since your information gathered on the children of the household is important. If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time.

In case you need more information about the survey, you may contact the person listed on this card.

Do you have any questions?

May I begin interview now?

\_\_\_\_\_ Date: \_\_\_\_\_

(Signature of Respondent if literate)

## II. CHILDREN'S QUESTIONNAIRE

- **Purpose of the Questionnaire:** The child health indicator of the MPI focuses on child undernourishment. This questionnaire records anthropometric information for children between 0-5 years of age in order to determine if a child is undernourished. It should be administered after the household questionnaire has been filled out and a complete listing of all permanent members, including children, is available.
- **Who in the household should be included?** All children between 0-5 years of age listed in the roster<sup>4</sup>

	Question	Child 1	Child 2	Child 3	Child 4	Child 5	
1	<b>Interviewer</b> <b>Checkpoint:</b> list line number from roster  Roster ID/Name <i>[GIQ]</i>	Line Number: ____ ____  Name: _____	Line Number: ____ ____  Name: _____	Line Number: ____ ____  Name: _____	Line Number: ____ ____  Name: _____	Line Number: ____ ____  Name: _____	
2	Child Weight <i>in kilograms</i> <i>[CHH]</i>	Child Weight (Alone): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 1 (Mother + Child): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 2 (Mother): <input type="text"/> <input type="text"/> . <input type="text"/>  Not Present.....9994	Child Weight (Alone): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 1 (Mother + Child): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 2 (Mother): <input type="text"/> <input type="text"/> . <input type="text"/>  Not Present.....9994	Child Weight (Alone): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 1 (Mother + Child): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 2 (Mother): <input type="text"/> <input type="text"/> . <input type="text"/>  Not Present.....9994	Child Weight (Alone): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 1 (Mother + Child): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 2 (Mother): <input type="text"/> <input type="text"/> . <input type="text"/>  Not Present.....9994	Child Weight (Alone): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 1 (Mother + Child): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 2 (Mother): <input type="text"/> <input type="text"/> . <input type="text"/>  Not Present.....9994	Child Weight (Alone): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 1 (Mother + Child): <input type="text"/> <input type="text"/> . <input type="text"/>  Weight 2 (Mother): <input type="text"/> <input type="text"/> . <input type="text"/>  Not Present.....9994

<sup>3</sup> The roster for child health is based on DHS and MICS questionnaire for child anthropometry (DHS Phase 6 Household Questionnaire; MICS3 Questionnaire for Children Under 5)

<sup>4</sup> Ideally, information for all children between 0-5 years of age in the household should be collected. Where resource constraints allow for only sub-sample of children in the household, the number of children is determined such that the sample is representative at the necessary geographic level

### III. WOMEN'S QUESTIONNAIRE

- **Purpose of the Questionnaires:** The adult health indicator of the MPI focuses on adult undernourishment as determined by low BMI. This questionnaire records anthropometric information for women of reproductive age, i.e. between 15-49 years, in order to determine if a female adult is undernourished. It also collects information on child mortality. It should be administered after the household questionnaire has been filled out and a complete listing of all permanent members, including children, is available.
- **Who in the household should be included?** All women between 15-49 years of age who usually live in the household and are listed in the household roster<sup>5</sup>

	Question	Code
1	<b>Interviewer Checkpoint:</b> list from roster  Line Number/Name [GIQ]	Line Number: ____ ____  Name _____

**Cover Sheet – Men’s Questionnaire**

**Town/City/Village/:** \_\_\_\_\_

**HH ID:** \_ \_ \_

**Survey Date 1:** \_ \_ / \_ \_ / \_ \_ \_ \_ \_

**Survey Date 2 (if revisit):** \_ \_ / \_ \_ / \_ \_ \_ \_ \_

**Surveyor 1 ID (Male):** \_ \_

**Start Time:** \_\_\_\_\_

**End Time:** \_\_\_\_\_

**Consent:** Hello. My name is \_\_\_\_\_. I am working with (NAME OF ORGANIZATION). We are conducting a survey about living standards and health all over (NAME OF COUNTRY). The information we collect will help the government plan services. Your household was selected for the survey. I would like to ask you some questions about you as well as measure your height and weight. The whole questionnaire usually takes about 10 to 15 minutes. All of the information collected will be confidential and will not be shared with anyone other than members of our survey team. You don't have to be in the survey, but we hope you will agree to answer the questions since your views are important. If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time.

In case you need more information about the survey, you may contact the person listed on this card.

Do you have any questions?

May I begin interview now?

\_\_\_\_\_ **Date:** \_\_\_\_\_

**(Signature of Respondent if literate)**

#### IV. MEN'S QUESTIONNAIRE

- **Purpose of the Questionnaire:** The adult health indicator of the MPI focuses on adult undernourishment as determined by low BMI. This questionnaire records anthropometric information for men between 15-59 years of ages in order to determine if a male adult is undernourished. It also collects information on child mortality. It should be administered after the household questionnaire has been filled out and a complete listing of all permanent members, including children, is available.
- **Who in the household should be included?** All men between 15-59 years of age who usually live in the household and are listed in the roster<sup>9</sup>

		Code
1	<b>Interviewer:</b> Note from Roster  Roster ID/ Name [GIQ]	ID: ____  Name _____
2	Weight <i>in kilograms</i> [ADH]	<b>Weight (Alone):</b>  <input type="text"/> <input type="text"/> . <input type="text"/> Not Present.....9994 Refused.....9995 Other .....9996
3	Height <i>in cm</i> [ADH]	<input type="text"/> <input type="text"/> <input type="text"/> . <input type="text"/> Not Present.....9994 Refused.....9995 Other .....9996
4a.	Have you ever fathered a son or daughter who was born alive but later died? <b>Interviewer Checkpoint:</b> If no, probe – Any baby who cried or showed signs of life but did not survive [CM]	Yes .....1 No .....2 Don't Know .....98
4b.	How many boys have died?  And how many girls have died?  <b>Interviewer:</b> If none, record 0 [CM]	Boys Dead..... <input type="text"/> <input type="text"/>  Girls Dead..... <input type="text"/> <input type="text"/>

<sup>7</sup> The roster for men's health is based on DHS Phase 6 Household Questionnaire and DHS Phase 6 Man's Questionnaire

<sup>8</sup> For some countries, the DHS administers the surveys on all men between the age of 15 and 54 years in the household

<sup>9</sup> Ideally, information for all men between 15-59 years of age who usually live in the household should be collected. Where resource constraints allow for only a sub-sample of men in the household, the number of respondents is determined such that the sample is representative at the necessary geographic level
